The world's first
Member Data Platform

Description:

Wicket is the anti-AMS. As the world's first Member Data Platform™ (MDP), we've reinvented how associations manage and engage their members. We give you the freedom to integrate with any best-in-class, third-party software without having to compromise a unified view of your member data. Choose the right tool for your email marketing, events, e-commerce and learning management needs while maintaining a single source of truth and persistent member record.
