

## Blue Sky eLearn (Path LMS)

Blue Sky eLearn's Path LMS is an award-winning learning management system specifically designed for media content from educational events. Path offers a new way of publishing, managing, and delivering learning content for external and internal audiences, helping to reduce barriers to implementing online learning programs with an easy-to-use, mobile-ready solution.

Path is built upon the most current technologies available and utilizes responsive web design to offer the most optimal end-user experience across a wide range of devices including tablet devices, mobile phones and desktop computers.

With an intuitive user interface and navigation structure that simplifies content management, Path is unlike any other solution in the market and allows for self-service or fully-managed administration with online event and course creation, management and editing.

Path seamlessly integrates with many AMS platforms for single-sign on, eCommerce and activity writeback as well as testing and certification platforms for additional badging, proctoring and certification solutions
