

Conference Compass

If you run a large event, with multiple sessions, each having a host, a line-up of speakers, and an audience, you need a flawless experience for everyone involved. Whether you run a fully virtual or hybrid event, our Virtual Event Platform will unify and engage your community as one. Compared to many off-the-shelf solutions, it offers a number of clear benefits:

- It's cloud-based: directly from the browser, without the need to install any software;
- It's fully integrated with our event and society app platform and easy to use, offering a complete user-experience for attendees, speakers, and organizers;
- And it provides access for attendees on any device, from a full-screen web application on your laptop or desktop computer to a native mobile app, for smartphones and tablets.

Our event apps have enabled associations and meeting planners for many years to captivate their online and live audiences and turn them into active communities
