

TEAM Event Management

When it comes to B2B matchmaking and appointment scheduling - You name it, we do it! TEAM™ pioneered the B2B appointment scheduling market in 1992. Our latest product – TEAM™ Virtual B2B appointments - builds on those 28 years of evolution and experience to bring B2B meetings to the virtual environment.

Events are no longer about gathering for a few days once a year. We bring your attendees together before, during and after your event and help them build their business 365 days a year.

Attendees use our intuitive AI driven algorithms to manage their priorities. Avoid the time consuming and inefficient process of attendees requesting individual time slots - let TEAM™ do all the work!

Socially distant networking means attendees can meet virtually anytime, anywhere. Whether a flight cancellation prevents attendees from making their in-person appointments, or a global pandemic impacts turns your physical meeting into a virtual meeting.
